

COMMANDS FROM THE SYSTEM PROMPT

To use the following commands, your DOS path should include the WordStar directory. If it doesn't, you need to log on to that directory.

COMMAND	DESCRIPTION
<code>ws</code>	Starts WordStar and goes to the Opening Menu.
<code>ws filename</code>	Starts WordStar and opens the file <i>filename</i> in document mode unless the default has been changed to nondocument.
<code>ws filename/n</code>	Starts WordStar and opens the file <i>filename</i> in nondocument mode.
<code>ws filename/d</code>	Starts WordStar and opens the file <i>filename</i> in document mode.
<code>ws filename/s</code>	Starts WordStar and opens a new file with no filename.
<code>ws filename/p</code>	Starts WordStar and prints the file <i>filename</i> .
<code>ws filename/x</code>	Starts WordStar, opens the file, and exits WordStar upon returning to the Opening screen. (Use x with another option; see next example.)
<code>ws filename/p/x</code>	Starts WordStar, prints the file <i>filename</i> , and exits to DOS.
<code>ws filename/o nnn</code>	Starts WordStar, opens the file, and goes to the decimal location <i>nnn</i> .
<code>ws filename/hn</code>	Starts WordStar, opens the file, and sets the help level at <i>n</i> .
<code>ws filename/m macroname</code>	Executes the named macro from inside the file <i>filename</i> .
<code>ws /m macroname</code>	Plays the named macro from the Opening screen.
